

WELL-LOGGING TECHNICAL REPORT No. 1

Table of Contents

Project No. 1. 2
Survey of Experimental Methods for Measuring the Dielectric Constant
and the Conductivity of Core Samples at VHF and Microwave Frequencies

Project No. 2. 22
Measurement of Dielectric Constant and Conductivity of Highly Conduc-
tive Rock Samples at UHF Using Coaxial-Line-Scattering-Matrix-Method
Part I Analysis of Error Due to Presence of Gaps

Project No. 3. 51
Measurement of the Dielectric Constant and the Electrical Conductivity
of Highly Conducting Rock Samples at UHF Using Coaxial-Line-Scattering-
Matrix-Method
Part II Automated Data Acquisition System

Project No. 4. 61
Measurement of Conductivity and Dielectric Constant of Highly Con-
ducting Medium Using an Insulated Antenna

Project No. 5. 70
Measurement of Conductivity and Dielectric Constant of Highly Con-
ductive Rock Samples below 30 KHz

Project No. 6. 79
Modelling of Induction Tools

Project No. 7. 88
New Theoretical Analysis of the Response of Induction Tools Under
Mixed Boundary Conditions

Project No. 8. 95
Sample Preparation Laboratory
