Acknowledgement	ii
Research Staff	iii
Table of Contents	iv
Chapter 1 - Theoretical Analysis of the Response of Induction Tools Under Mixed Boundary Conditions. Investigators: L. C. Shen and G. J. Zhang	
.	1
Introduction	1
Analysis Using Perturbation Theory	1
Evaluation of Correction Terms	4
Practical Calculation of Apparent Conductivity	10
Comparison of Perturbation Method with Doll's Method	12
References	15
Software for Calculations	28
Chapter 2 - Physical Modeling of Induction Logging. Investigators: M. C. Shang, L. C. Shen, and R. S. Simpson	
.	61
Induction Tool Electronics	61
Calibration of Model Tool	64
Formation Modeling	70
Chapter 3 - Measurement of Dielectric Constant and Conductivity of Rocks in the Frequency Range from 0.1 GHz to 2.0 GHz. Investigators: L. C. Shen, R. S. Simpson, and S. J. Su	
.	81
Introduction	81
Background	83
Theoretical Considerations for Rock Samples	85
Data Acquisition System	93
Control System	97
Sample Holder	102

	Data Correction	104
	Results	114
	Bibliography	117
	Appendix	119
Chapter 4 -	Measurement of Conductivity and Dielectric Constant of a Medium Using an Insulated Antenna. Investigators: F.S.C. Huang and L. C. Shen	127
	Introduction	127
	The Insulated Antenna	128
	Relevant Formulas	131
	Measurement of Saline Solutions	146
	References	150
Chapter 5 -	Measurement of Dielectric Constant of Rocks at Low Fre- quency. Investigators: S. Chowdhury, L. C. Shen, and R. S. Simpson	151
	Introduction	151
	Background	151
	Theory of Polarization	152
	Measuring Techniques	158
	Sample Holder Design	161
	Instrumentation System	173
	References	181
Chapter 6 -	Sample Preparation Laboratory. Investigator: R. S. Simpson	183
